

## ABSTRACT

3 A carrier and docking assembly in combination for removeably interconnecting a  
4 PC card device with a computer. The docking assembly is configured in size to be fixed  
5 in a memory storage device bay of a computer housing, or a memory storage device  
6 housing. The docking assembly includes a plug for the carrier, a power connector and an  
7 interface connector. The interface connector is adapted for connection with an IDE  
8 ribbon cable. The carrier includes a PC card device for receiving PC cards and a plug for  
9 interconnection with the docking assembly. The carrier plug removeably couples with  
10 ~~the plug of the docking assembly.~~
